

Our Interests @ PURDUE

UNIVERSITY

*Sonia Lasher-Trapp, Colleen Henry (PhD),
Jennifer Bewley (MS), Ashley Shackleford (BS)*

■ Warm Rain Initiation:

- Giant/ultragiant aerosol particles
- Entrainment and mixing

Our Interests @ PURDUE UNIVERSITY

Sonia Lasher-Trapp, Colleen Henry, Jennifer Bewley, Ashley Shackelford

■ Observations:

- Radar study, and aircraft data study-- contrast precipitating vs non-precipitating trade wind cu
- Role of giant aerosol, sounding characteristics
- "Generalize" radar echo evolution and aircraft data (precip) for each case
- Promising cases: 9, 10 and 20 Dec,
7 and 19 Jan

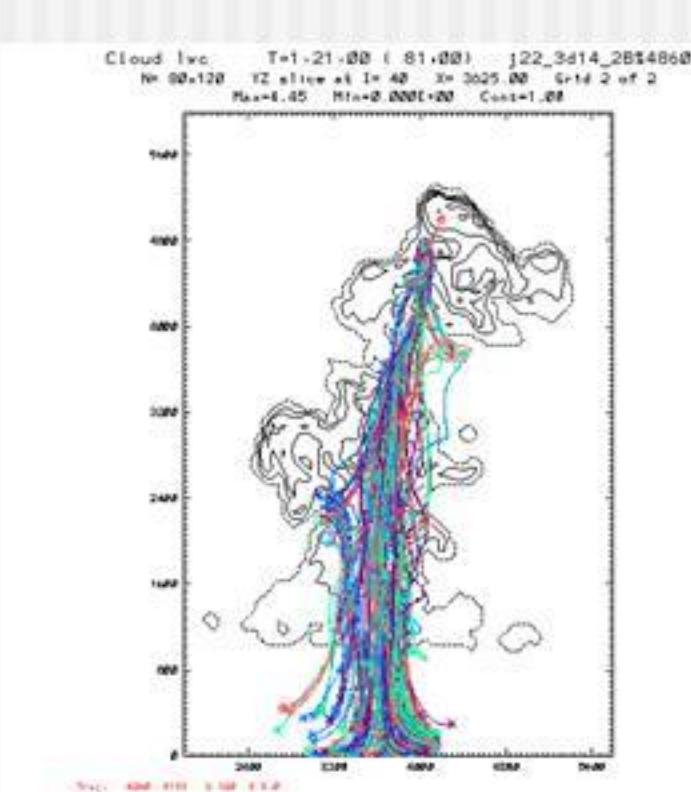

Our Interests @ PURDUE UNIVERSITY

Sonia Lasher-Trapp, Colleen Henry, Jennifer Bewley, Ashley Shackelford

■ Modeling:

- Extend calculations along trajectories to include coalescence
- Investigate influence of cloud initiation in model upon trajectories and cloud evolution
- Test hypotheses using LES and trajectories by comparing results to "generalized" radar echo and aircraft obs

FSSP avg conc for low and mid-level aerosol circles
